

# Project

## Vehicle CNG booking Web Application

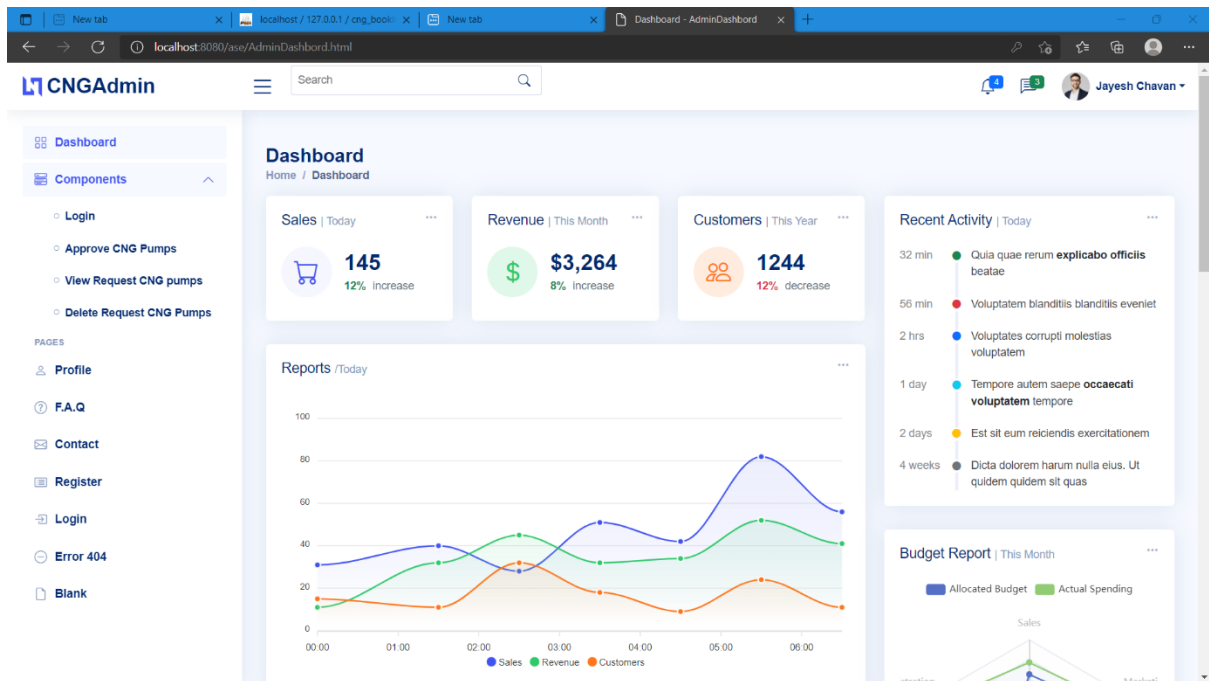

In this project I build the Web Application like Vehicle CNG Booking System. In this Project I build the Application for general CNG seller

And for making this Application I use the Advance java programming language .In this Application There is the one Admin page on which the Admin of the pump can be handle this page for those I provide the functionality like they can View the All pumps Under there area and He also rights to Delete the request or Approve the request of the pumps.

The second page is for Seller on which they can resister Their pumps and he also view the All pumps under Their Area and also Update the Amount of CNG that have. and also see the Booking of the CNG.

The third Page is for user on which user can Resister themself and he also view All the Pumps Under their area and also book the CNG that have.

admin

The screenshot shows the AdminLogin page. It features a central login form with the CNGAdmin logo at the top. The form includes fields for Email and Password, a 'Remember me' checkbox, and a 'Login' button. Below the form, there are links for 'User login' and 'Don't have account? CNGPumps login'. The footer of the page states 'Designed by Jayesh chavan'.
